MODERN SOLID WILL TAKE ŠKODA BRAND TO THE NEXT LEVEL

STRATEGY

MODERN SOLID

MANIFESTATION

DISCLAIMER

- This presentation contains perspective statements and information about the business development of the ŠKODA brand. Such statements can be made in writing or orally and be recognised from words such as ‘expect’, ‘assume’, ‘intend’, ‘plan’, ‘believe’, ‘seek’, ‘estimate’ and ‘become’, or other words with a similar meaning. This means that they are based on assumptions regarding the development of the economies in the individual countries and of the automotive industry in particular, which we have made based on the information available and which we considered to be realistic at the time of printing. The assessments made here include a certain element of risk, and the actual developments may deviate from the forecasts stated.
- Consequently, any unexpected decline in demand or any economic stagnation in our core markets such as in Western Europe (particularly Germany) or China will have a corresponding influence on our business development. This also applies in cases of considerable adjustments to the current exchange rate with regards to the euro, the US dollar, the British pound or the Chinese renminbi.
- Should one of these risks or others occur, or in the event that the assumptions that underlie these statements prove to be incorrect, the actual results may substantially deviate from those expressed by the statements or contained in them.
- We do not retrospectively update the perspective statements. These forecasts are valid at the time of publishing and may be replaced.
