charging time: 1 hour
(80% battery capacity)

PART OF THE CHARGING STATION

COMBINED CHARGING SYSTEM (CCS) socket (AC/DC)

AMBITION ◉ STYLE ◉

BRAKE ENERGY REGENERATION

- › When the accelerator is released, the electric motor's braking function slows down the vehicle and simultaneously recuperates brake energy
- › Electricity recovered by regenerative braking is stored in the traction battery and is used to drive the vehicle

AC = alternating current
DC = direct current
