The ŠKODA KAROQ SPORTLINE: impressive top model

- › Exclusive to the series with a 2.0 TSI petrol engine and 140 kW (190 PS)
- › Stunning black design features on the exterior and 18-inch wheels set the KAROQ SPORTLINE apart
- › Sports seats with breathable ThermoFlux covers and black interior details

Mladá Boleslav, 4 April 2022 – The SPORTLINE is the range-topping model in the ŠKODA KAROQ line-up. Apart from the 1.0 TSI, the KAROQ SPORTLINE is available with any of the engines in the range. The 2.0 TSI petrol engine with an output of 140 kW (190 PS), which comes with a seven-speed DSG and all-wheel drive as standard, is exclusively reserved for the KAROQ SPORTLINE. The exterior of this sporty range-topping model is characterised by a host of black design details, exclusive alloy wheels and SPORTLINE badges. Black sports styling also continues in the interior. The brand's SPORTLINE models celebrate their 30th anniversary in 2022, following ŠKODA's introduction of this dynamic variant in 1992 with the FAVORIT.

The SPORTLINE is the top-end model in the KAROQ range. This trim variant debuted 30 years ago in the ŠKODA FAVORIT and could always be identified by its black design features. The SPORTLINE's grille with gloss black surround and matt black slats provide a stunning contrast to its body-coloured front apron featuring a model-specific central air inlet and black detailing. The wing mirror caps are also gloss black, as are the window frames, roof rails and rear diffuser. The side skirts are body-coloured, as is the rear apron that features striking, built-in chrome-effect tailpipes. The rear side windows and the rear window are tinted (SunSet), and the front wings are adorned with a SPORTLINE badge. The KAROQ SPORTLINE comes with full-LED Matrix headlights as standard.

Large alloy wheels with Aero trim

As standard, the KAROQ SPORTLINE rolls on black 18-inch Procyon alloys with matt black plastic Aero inserts. The 19-inch Sagitarius alloy wheels are optional. They feature a metallic anthracite finish and are available with anthracite, black or matt black Aero inserts.

Black interior with breathable ThermoFlux seat covers

Black sports styling runs through the interior, from the roof lining and pillars to the breathable ThermoFlux covers of the sports seats with integrated headrests. At up to 360 l per minute, the ThermoFlux covers allow 4.5 times more air to pass through than conventional fabric, significantly improving seating comfort. Leather seats are optional. Silver contrasting stitching can be found on the leather gearstick, the centre armrest and the three-spoke multifunction sports steering wheel adorned with a SPORTLINE badge. Piano Black decorative strips on the dashboard and carbon-effect trim on the door panels provide the finishing touches in the interior. The decorative front door sill trims feature KAROQ lettering, while the pedal caps sport a stainless-steel look. The 10.25-inch digital instrument cluster features a SPORTLINE-specific background.
