

## Kodiaq Sportline: Comprehensive equipment, typical black accents and a metal-look trim in the interior

- › **Glossy black accents:** Škoda grille frame, exterior mirrors, roof rails, D-pillar and upper part of the window frames
- › **Sporty interior:** specific Sportline Design Selection
- › **Standard equipment:** LED Matrix beam headlights, LED rear lights with animated indicators and electric tailgate operation

Mladá Boleslav, 8 April 2024 – The Kodiaq Sportline is the current top model in the second generation of the large Škoda SUV. Its comprehensive standard equipment includes LED Matrix beam headlights, electric tailgate operation and KESSY Advanced. The exterior is marked by numerous glossy black accents, which now also extend to the D-pillar. The front and rear aprons as well as the side skirts are in body colour, while the 19-inch alloy wheels, exclusive to the Sportline, have a polished anthracite finish. The interior of the Sportline Design Selection is dominated by sporty black combined with sporty trim elements. The Kodiaq Sportline can be ordered with all powertrains offered for the model series, including the Kodiaq iV plug-in hybrid drive.

### Many black details, including for the first time the entire D-pillar

Škoda's Sportline models typically come with numerous black details as a distinguishing feature. The second-generation Kodiaq is no different: in addition to the Škoda grille frame, exterior mirror covers, upper part of the window frames, roof rails and rear diffuser, the entire D-pillar is painted in glossy black. This provides a visual link between the darkened rear side windows and the darkened rear window (Sunset). The Škoda lettering and model designation on the tailgate also come in black, while the front and rear aprons and side sills are painted in body colour. The front wings bear new Sportline badges. The 19-inch alloy wheels have a polished anthracite finish and are exclusive to the Sportline; anthracite polished 20-inch alloy wheels with matt black Aero covers are available as an option.

### LED Matrix beam headlights, electric tailgate operation and KESSY Advanced as standard

The comprehensive standard equipment of the Kodiaq Sportline includes LED Matrix beam headlights featuring an animated welcome effect and a cornering function as well as LED rear lights with animated indicators, linked by a red decorative strip between the two rear lamps. Electric tailgate operation is also included as standard. The KESSY Advanced system, featuring Open On Approach and Walk Away Locking functions, is also a standard feature in the new Kodiaq Sportline. The improved DCC Plus Dynamic Chassis Control with an even wider adjustment range than before is available as an option. The Sportline variant

can be ordered with all powertrains offered for the second Kodiaq generation, including the Kodiaq iV plug-in hybrid.

**Specific Design Selection: Sportline**

In the interior, the current top model of the large Škoda SUV's second generation features the specific Sportline Design Selection. This includes sports seats with integrated headrests and black perforated Suedia/artificial leather upholstery with grey contrast stitching. The driver's seat is electrically adjustable as standard and comes with a memory function. Like most of the interior, the headliner is finished in sporty black. The pad on the instrument panel, the door inserts and the centre armrest are covered in black Suedia, which is exclusive to the Sportline Design Selection. Visual contrasts are provided by grey X-shaped stitching as well as specific metallic grey decorative trim strips on the dashboard and in the door inserts, where they are complemented by a Unique Dark Chrome frame. The Kodiaq Sportline comes with a 3-spoke multifunction sports steering wheel with black stitching and also bears a Sportline badge. The front door sills feature Kodiaq lettering. Like the other models in the series, the Kodiaq Sportline complements the 10-inch Virtual Cockpit with a standard free-standing 10-inch infotainment screen. This displays a Sportline welcome logo when the driver enters the vehicle. The larger, free-standing 13-inch infotainment display is optionally available as part of the Technology 13" package.

Design Selection	Seat upholstery	Standard features	Optional features
Sportline	Perforated Suedia, artificial leather	<ul style="list-style-type: none"> <li>• Electrically adjustable driver's seat</li> <li>• Memory function</li> <li>• Ambient lighting</li> <li>• Specific decorative trim strips on the dashboard and in the door inserts</li> </ul>	<ul style="list-style-type: none"> <li>• Electrically adjustable front seats</li> </ul>
