

# Elroq and Enyaq – model range updates

## Android-based infotainment system

The new infotainment system introduces an updated look and controls, a redesigned home screen, a clear grid layout, favourite items and a search function

- ▶ New home screen layout
- ▶ Climate control and favourite functions are now positioned on either side of the screen

- ▶ The main menu is organised in an app grid, with the option to search and create folders for easier navigation
- ▶ Favourite items arranged on the left side of the screen for better accessibility

- ▶ Powerpass information integrated into the navigation system with extensive filtering options for charging stations
- ▶ Online Google search in the navigation maps
- ▶ Overview of Google POIs in the maps, such as restaurants, cafés, hotels and tourist attractions

- ▶ Škoda App Store and selected third-party apps such as Spotify, YouTube and other apps from the audio and video streaming, casual gaming, news and weather categories, among others
