

Connectivity: intuitive digital services and seamless vehicle access

- › **Latest 13" Android-based infotainment system as the “digital hub” of the vehicle**
- › **Plenty of entertainment applications, extensive personalisation options and seamless smartphone integration**
- › **MyŠkoda app with remote vehicle access, EV-specific services and a charging overview**

Mladá Boleslav, 19 May 2026 – The new Škoda Epiq is equipped with the latest 13" Android-based infotainment system, designed from the outset for intuitive use. Thanks to seamless smartphone integration, the infotainment system becomes an extension of the user's mobile device. Digital services are complemented by the MyŠkoda app, which provides remote access to important vehicle information, EV-specific functions and charging services, including the control of Škoda Charger wallboxes.

13" Android-based infotainment system

The Škoda Epiq is equipped with the latest 13" Android-based infotainment system. Compared with the previous generation of infotainment systems, it offers updated graphics, redesigned controls, and a new home screen with a clear grid-based app layout. Functions such as favourites, a system-wide search, and expanded personalisation options support intuitive operation. In addition to native Škoda applications, users have access to dedicated third-party apps such as Spotify, YouTube, and Google Maps.

Digital key readiness

The mobile digital key¹ is planned to debut in Škoda vehicles later this year, enabling drivers to use an iPhone or Android device in place of a conventional key. It will allow users to lock, unlock, and start the vehicle, and is designed to support convenient vehicle sharing between multiple drivers.

MyŠkoda app

The MyŠkoda app provides access to a wide range of vehicle functions and services. For electric vehicle users, it offers EV-specific features that simplify everyday use: Remote Charging allows users to start or stop charging manually when plans change. Following a one-time authorisation within the Powerpass subscription, Plug & Charge enables charging at public charging stations without additional authorisation. The Departure Planner ensures

¹ The Digital Key function is a planned future functionality. It will not be available at the time of vehicle delivery and will be enabled at a later stage via a future software update released by the manufacturer. Availability is subject to active Škoda Connect services.

that the vehicle is heated or cooled to the desired temperature at the specified time. For spontaneous journeys, the online Climate Control function allows remote heating, including seat and steering wheel heating, as well as air-conditioning.
