

## Škoda presents exterior sketches of its all-new electric seven-seater Peaq

- › **The initial exterior sketches of the large electric SUV offer a first glimpse of its clean lines and characterful design, following Modern Solid principles**
- › **The world premiere of the new Škoda flagship will take place in Monnetier-Mornex, France, at 18:25 on 23 June**

**Mladá Boleslav, 4 June 2026 – Škoda Auto has revealed exterior sketches of its all-new electric seven-seater Peaq. The new flagship SUV's visual presence is defined by clearly defined surfaces, precise lines, and distinctive lighting elements. The world premiere will take place in Monnetier-Mornex, France, at 18:25 on 23 June 2026.**

**Karl Neuhold, Head of Exterior Design at Škoda Auto**, explains: "In designing the exterior of the Škoda Peaq, we consistently applied the Modern Solid design language, combining clean lines, balanced proportions and distinctive elements. Precisely sculpted surfaces and clearly structured details create a confident, timeless presence, while signature features such as the T-shaped headlights and Tech-Deck Face express Škoda's identity in a new electric era."

At the front, the slender T-shaped headlights, gloss-black Tech-Deck Face and connecting element between them form a distinctive, frame-like loop motif. This is contrasted by the Volcano-shaped bumper, with its pronounced lower contour and clearly defined horizontal line.

The side view is dominated by the high shoulder line and wide D-pillars, emphasising the vehicle's strong stance. The structured surfaces further underline its bold proportions. The sketches also highlight flush door handles seamlessly integrated into the bodywork.

The rear mirrors the front design, with T-shaped tail-lights and a connecting element forming the unmistakable loop motif. This visually sets the Peaq apart while ensuring it is recognisable at first glance.

The world premiere of the all-new Škoda Peaq will take place in Monnetier-Mornex, France, at 18:25 on 23 June.
