

3D-printable accessories take Simply Clever to the next level

- › Škoda Auto launches free 3D-printable accessories on Printables.com, becoming the first carmaker to offer these through a dedicated platform
- › Practical vehicle add-ons include storage boxes, cable management tools and cupholders
- › Products are designed for both current and discontinued Škoda models

Mladá Boleslav, 19 October 2026 – Škoda Auto is expanding its range of Simply Clever features with a comprehensive selection of free 3D-printable accessories on Printables.com. Through Škoda's profile on the world's largest platform of its kind, users can download practical accessories such as cupholders and storage boxes free of charge and print them to further enhance the everyday usability of their vehicles. Designed by the carmaker's innovation incubator, engineers and designers, the range covers both current and discontinued models.

Simply Clever features, which make the everyday use of a car more convenient, have long defined Škoda. New 3D-printable accessories now take that approach to the next level and into the home workshop. On Printables.com, users can choose from a growing range of accessories, adapt the files to suit their needs and print them on their own 3D printer. Developed by Škoda's innovation incubator, design and engineering teams, the accessories offer new solutions without the lead times, tooling and inventory required for conventional production.

Functional focus, designed for everyday use

The initiative builds on the very positive feedback from the Škoda community on the brand's previously released 3D vehicle models. In response, Škoda has developed new accessories that add functionality and convenience, including cupholders, cable management tools, coin boxes, USB cable and cap hooks for seat-back pockets, phone brackets and top tether hooks – all designed to work across multiple models. Many items make use of existing storage compartments without requiring any modification to the vehicle itself.

Tailored solutions for the Peaq and Epiq

Specifically for the Epiq and Peaq, customers can download cupholder covers, a jumbo box tray, special inserts and holders, and a lower console organiser. A clip-on cupholder for the Peaq's foldable table also accommodates both standard and large cups. These accessories were specifically requested by the community. User feedback on Printables.com helps the Škoda team decide which ideas to bring to life next.

Supporting every Škoda on the road

Škoda's range of 3D-printable accessories is compatible with current models and many discontinued models. The early community response has been very positive, with the top-performing accessory to date being the top tether hook. Customers can browse and download the full library at printables.com/@Skoda.
